No Likelihood

Strong sunlight
Low Likelihood

Weather and chance of precipitation at 600m					
Time					
06:00	09:00	12:00	15:00	18:00	21:00
Heavy Rain	Light rain showers	Light rain showers	Thundery showers	Light rain showers	Partly cloudy (night)
Precipitation probability					
50%	50%	50%	60%	50%	20%

Forecast for Tuesday 11 Jul 2023

Weather: A rather cloudy start with outbreaks of rain, occasionally heavy, gradually clearing. Some bright or sunny spells will develop but these should be brief and quickly give way to showers spreading in from the west. These will intensify and become widespread in the morning, heavy at times with a risk of thunder in the afternoon. Moderate to strong gusts likely across the highest peaks and in and around showers. Showers slowly easing during the evening, the park becoming largely dry and clear.

Chance of cloud-free hill tops above 600m: 30% rising to 60% through the morning.

Low Cloud and visibility: Areas of low cloud around 400 m at first, giving poor visibilities across high ground. Bases should gradually lift and break to allow some improvement early afternoon, but highest tops may hold onto cloud throughout. Expect rapid deteriorations in cloud base and visibility around showers. Visibilities generally good outside of showers.

Valley	14/13	15/14	15/13	17/15	16/14	13/13	13/13
Freezing Level*	2300m	2300m	2300m	2200m	2200m	2100m	2100m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Sudden heavy downpours may cause slippery paths and localised flooding as well as reduced visibilities. Thunderstorms can also cause danger to life so take extra care if hiking.

Recent rainfall: measured at Malham: altitude 375m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Mon 10 Jul 2023	5.6mm	18.2mm	18.2mm

Forecast for Wednesday 12 Jul 2023

Weather: Fine and dry overnight, but scattered showers developing during the morning. These once again pose a risk of heavy downpours and thunderstorm activity, before dying away in the evening.

Maximum wind: West to South-westerly 25mph gusting 35-40mph.

Chance of cloud-free hill tops above 600m: 80-90%.

Low Cloud and visibility: Low cloud mainly in the west of the park during the morning with bases 400 m. This soon lifting and breaking to above summits. Generally good visibilities but turning poor in any heavy downpours or thunderstorms

Temperature: **Valleys:** Plus 11 deg C rising to Plus 18 deg C
At 600m: Plus 09 deg C rising to Plus 13 deg C
Freezing level: Above summits.
